

# Verifying Eligible Voters

What happens to voter registrations after you drop them off? How do we make sure that only eligible voters get registered? What do we do with forms missing required information?

All great questions! All voters should verify their registration online at [www.Maricopa.Vote](http://www.Maricopa.Vote) before each election. In the meantime, this flow chart illustrates how the MCRO processes forms.

**The Voter Registration Department starts** by sorting forms into three different categories: complete, missing proof of citizenship, missing other required fields.

The MCRO uses information from the courts, Department of Health Services, and other agencies to regularly update the voter registration database. Arizona is a proud member of E.R.I.C., which checks voter registrations across state lines and helps keep the voter registration rolls current.
